

Policies & Procedures for Beacon Pilot Program Lookout Mountain Water District

Introduced by Badger Meter, "Eye on Water" provides customers a way to log on via computer/smart phone to check their water usage. This technology shows customers if there are leaks, tampers and other issues with the meter, as well as reads. The Board approved the Beacon Endpoint Meters for sale to customers on a voluntary basis.

Eye on Water Fees:

- \$175.00 for Beacon Orion Cellular Endpoint Assembly plus HR-E LCD Encoder from National Meter
 - \$200.00 for Installation and Set-up
 - \$1.00 per month for software
- \$375.00 prior to installation.**

Once the \$375.00 is paid, Lookout Mountain Water District staff will issue a work order for the installation of the new technology. If your meter is located inside your home, a customer must be present for the installation appointment. Once activated in the software, customer will be notified by email with log-on invitation to "Eye On Water".

Please initial and sign below:

_____ I understand that the Lookout Mountain Water District is the owner of all meters (by policy,) and the Beacon system is the property of Lookout Mountain Water District.
